PROFILE

Computer Science graduate and frontend developer in Rawalpindi/Islamabad, Pakistan, who builds fast, responsive, bilingual web apps with React, TypeScript and Tailwind. Recently completed a 6-month certified MERN Stack program and now growing toward full-stack work with Node.js. Also an independent commodity trader for 3+ years, which brings a disciplined, risk-aware way of working and an eye for fintech and proptech products. Seeking remote roles or internships with international teams.

TECHNICAL SKILLS

Frontend	HTML5, CSS3, Tailwind CSS, React
Languages	JavaScript (ES6+), TypeScript
Backend & Database	Node.js, Express, MongoDB (MERN)
Tools & Methods	Git, GitHub, GitHub Actions, Figma, Agile
Trading	Technical Analysis, Risk Management, Trading Psychology, Global Markets

PROJECTS

Personal Portfolio Website *2026*

Rebuilt my portfolio with React, TypeScript and Tailwind CSS: English and Urdu (right-to-left) versions, dark and light themes, a multi-step contact form that emails me through EmailJS, a Supabase-backed like counter, skeleton loading, and an automatic GitHub Actions deployment to GitHub Pages. Focused on accessible, responsive UI and production-ready code.

Rang Mahal — Event Booking & Management Website *2024*

A full-stack platform to streamline event planning for both clients and organizers. Led complete frontend UI, responsive design, and database architecture using MongoDB. Final year team project.

Role: Frontend Developer | Stack: Figma, HTML, Tailwind, TypeScript, + backend and database

EXPERIENCE

Independent Commodity Trader

Self-Directed | 2023 – Present

- Managing a personal trading account for 3+ years with consistent application of technical analysis and disciplined risk management.
- Managing trading portfolios for select clients on a profit-sharing basis, demonstrating accountability and consistent performance.
- Developed deep expertise in market psychology, global market dynamics, and risk-reward strategies.
